

Dr. Claudio Soto Azat

Veterinary Medicine (Universidad Austral), MSc in Wild Animal Health (Royal Veterinary College, UK), and Ph.D. in Conservation Medicine (Universidad Andrés Bello/Institute of Zoology). His main research interest are emerging diseases, invasive species management and biological conservation. Currently, he studies the eco-epidemiology of Ranavirus and chytridiomycosis in Chile, mechanisms involved in their emergence and co-evolution. Claudio is author of 15 ISI papers and he has been principal investigator of projects funded by the EDGE Fellowship Zoological Society of London, Wildlife Conservation Society, Fundación Futuro, the Chilean Science and Technology Fund (Fondecyt), among others. At present, Claudio is Director of the Sustainability Research Center at Universidad Andrés Bello and Regional co-Chair of the Amphibian Specialist Group IUCN – Chile.
