

Identification of Tennessee Anurans

Hyla versicolor

Matthew J. Gray, Ph.D.
College of Agricultural Sciences and Natural Resources
University of Tennessee-Knoxville

Anuran Families

Suborder Mesobatrachia **Order Anura** Suborder Neobatrachia

Bufonidae

True Toads

Scaphiopodidae

American Spadefoots

Microhylidae

Narrow-mouthed Toads

Hylidae

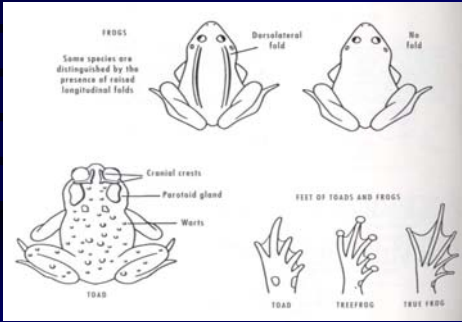

Tree Frogs

Ranidae

True Frogs

Morphological Characteristics

FEET OF TOADS AND FROGS

TOAD TREEFROG TRUE FROG

Family
Bufonidae

American toad

(*Bufo americanus*)

AMERICAN
(*americanus*)
Parotoid separate
or connected to
ridge by a spot

© Tom Tynning
Mass. Audubon

SVL = 3"

Eggs: 1-2 strings
(4,000-12,000 eggs)
>10 m length

Breeding Call

- Long, musical trill (constant)

Breeding Season

- Early (March)

Characteristics:

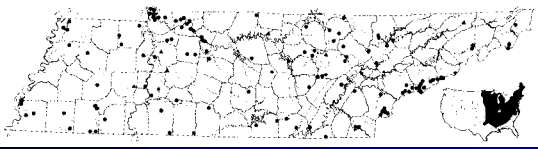

- Parotoid glands rarely touch cranial crest
- 1-2 granular glands "warts" per dark spot

Family
Bufonidae

American toad

(*Bufo americanus*)

Distribution:

<http://www.apsu.edu/amathas/>

- Eastern United States
 - **Statewide**

© Matt Brown

Family
Bufonidae

Fowler's toad

(*Bufo fowleri*)

FOWLER'S
(*fowleri*)
Parotoid touches
postorbital ridge

© Tom Tynning
Mass. Audubon

SVL = 2.5"

Eggs: 1-2 strings
(5,000-10,000 eggs)
<3 m length

Breeding Call

- Nasal "w-a-a-h"
- Sheep bleating or baby crying

Breeding Season

- Mid (May)

Characteristics:

- Parotoid glands touch cranial crest
- ≥ 3 granular glands "warts" per dark spot

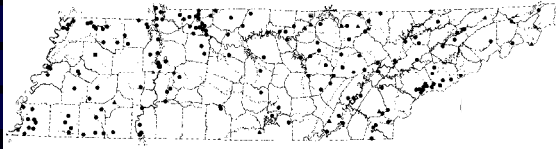

Family
Bufonidae

Fowler's toad

(*Bufo fowleri*)

Distribution:

<http://www.apsu.edu/amAtlas/>

- Eastern United States
- **Statewide**

Family
Scaphiopodidae

Eastern spadefoot

(*Scaphiopus holbrookii*)

Metatarsal tubercle

T-spores

© Tom Young, Miss Audubon

SVL = 2"

Breeding Call

- Nasal grunts: "wank, wank, wank"
- Young crow

Breeding Season

- Late (June, July) (heavy rain)

Characteristics:

- Vertical Pupil
- **Glanular glands but no parotoid glands**

Family
Scaphiopodidae

Eastern spadefoot

(*Scaphiopus holbrookii*)

Xeric
Adapted
Genera

Distribution:

<http://www.apsu.edu/amAtlas/>

- Southeastern United States
- **Statewide (rare Smokies)**

Family
Microhylidae

Eastern narrow-mouthed toad

(*Gastrophryne carolinensis*)

T-storms

SVL = 1"

Breeding Call

- High pitch buzz "bzzzzzz"
- Insect wings

Breeding Season

- Late (June, July) (heavy rain)

Characteristics:

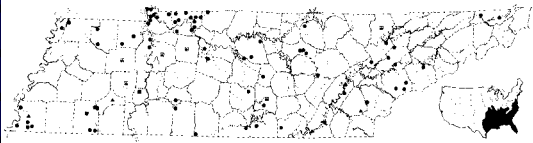

- Pointed snout, short limbs, plump body
- **Folded skin between eyes**

Family
Microhylidae

Eastern narrow-mouthed toad

(*Gastrophryne carolinensis*)

Distribution:

<http://www.apsu.edu/amathas/>

- Southeastern United States
- **Statewide (rare Smokies)**

Specialize in eating ants!

Family
Hylidae

Northern cricket frog

(*Acris crepitans*)

Acris = locust
crepitans = clattering

Breeding Call

- Metallic clicking (2 metal balls)
- Tempo changes: (slow-fast-slow)

SVL = <1"

Breeding Season

- Mid (May)

Characteristics:

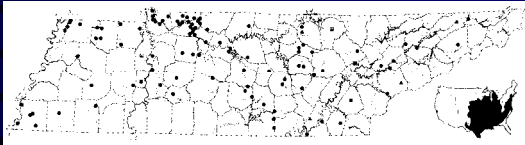

- Dark triangle between eyes; often bright "Y" racing stripe
- **>1/2 of longest toe on rear feet webbed**

Family
Hylidae

Northern cricket frog
(Acris crepitans)

Emergent wetlands with direct sun

Distribution:

<http://www.apsu.edu/amAtlas/>

- Midwest and Eastern U.S.
 - Statewide

Family
Hylidae

Southern cricket frog
(Acris gryllus)

Acris = locust
gryllus = cricket

Breeding Call

- Metallic clicking (2 metal balls)
- Raspier, shorter
- Tempo constant

Breeding Season

- Late (June, July)

SVL = <1"

Characteristics:

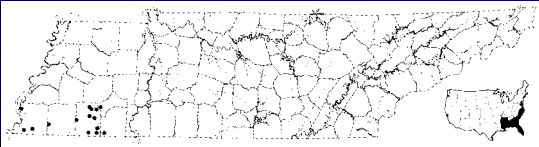

- Dark triangle between eyes; often bright "Y" racing stripe (more distinct line than *A. crepitans*)
- <1/2 of longest toe on rear feet webbed

Family
Hylidae

Southern cricket frog
(Acris gryllus)

Highly dexterous

Distribution:

<http://www.apsu.edu/amAtlas/>

- Deep Southern U.S.
 - Southwest TN

Family
Hylidae

Bird-voiced treefrog

(*Hyla avivoca*)

Highly arboreal:
forested wetlands and streams

Breeding Call

- Bird-like Chirping
- Whistling for dog

Breeding Season

- Mid (May, June)

SVL = 1.5"

Characteristics:

- Light green or gray with light-colored patch under eye
- No flash colors like gray treefrogs

Coloration can be highly variable!

Family
Hylidae

Bird-voiced treefrog

(*Hyla avivoca*)

Distribution:

<http://www.apsu.edu/amatlas/>

- Primarily MAV
- Western TN

Family
Hylidae

Green treefrog

(*Hyla cinerea*)

Breeding Call

- Short nasal repeating "quonk"
- Bicycle horn

Breeding Season

- Late (June, July)

SVL = 2"

Characteristics:

- Always green, smooth back and belly
- White/yellow stripe extending from upper lip mid-laterally

Family
Hylidae

Green treefrog
(*Hyla cinerea*)

**Good climbers,
Nocturnal**

Distribution:

<http://www.apsu.edu/amatlas/>

- Southeastern United States
 - **Western TN**

Family
Hylidae

Cope's Gray treefrog
(*Hyla chrysoscelis*)

Breeding Call

- Short raspy trill
- Faster than *H. versicolor*
34-69 pulses/sec 
- 1/2 chromosomes of *H. versicolor*

Breeding Season

- Mid (May, June)

Characteristics:

- Gray to greenish with mottled back
- **Yellow-orange flash colors under legs**

SVL = 2"

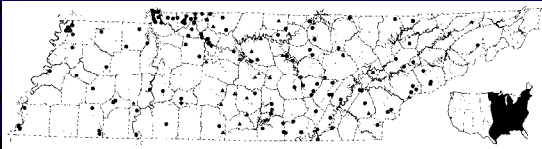

**Highly arboreal:
forested
wetlands**

Family
Hylidae

Cope's Gray treefrog
(*Hyla chrysoscelis*)

Distribution:

<http://www.apsu.edu/amatlas/>

- Eastern United States
 - **Statewide**

Family
Hylidae

Gray treefrog

(*Hyla versicolor*)

Breeding Call

- Short raspy trill
- Slower than *H. chrysoscelis*
17-35 pulses/sec
- 2X chromosomes of *H. chrysoscelis*

Breeding Season

- Mid (May, June)

Distribution

- West Tennessee

Species of
Concern
(G5, S5)

Characteristics:

- Gray to greenish with mottled back
- **Yellow-orange flash colors under legs**

Family
Hylidae

Barking treefrog

(*Hyla gratiosa*)

Breeding Call

- Steady raspy honk
- Sounds similar to a beagle bark or Canada goose
- Higher pitch than green frog

Breeding Season

- Late (June, July)

Characteristics:

- Solid green (granulated) or green with dark spots
- **White upper lip does not extend mid-laterally**

Largest of
the treefrogs
in Tennessee

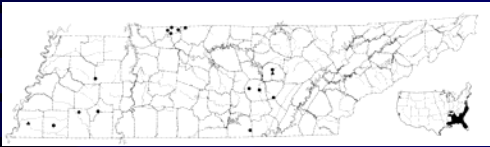

Family
Hylidae

Barking treefrog

(*Hyla gratiosa*)

Species of
Concern
(G5, S3)

Distribution:

<http://www.apsu.edu/amatlas/>

Males often
call from
water

- Deep Southern U.S.
 - **West TN & Cumberland Plateau**

Family
Hylidae

Spring Peeper

(Pseudacris crucifer)

Breeding Call

- Clear Distinct Peep

Breeding Season

- Early (Feb, March)

"Cross bearer"

SVL = 1"

Prefers woodland pools

Characteristics:

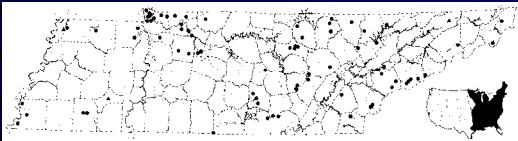

- Light-brown, smooth skin with dark line between eyes
- **Dark cross on back**

Family
Hylidae

Spring Peeper

(Pseudacris crucifer)

Distribution:

<http://www.apsu.edu/amatlas/>

- Eastern United States
- **Statewide**

Family
Hylidae

Mountain Chorus Frog

(Pseudacris brachyphona)

Breeding Call

- Short, raspy call that rises in pitch
- Running finger over comb but duller than *P. feriarum*

Breeding Season

- Early (April)

SVL = 1"

1/3 size of a wood frog

Characteristics:

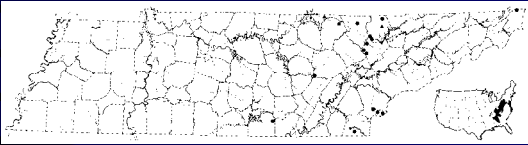

- Light-brown, smooth skin with dark line through eye
- **Backward parentheses on back (sometimes)**

Family **Hylidae**

Mountain Chorus Frog

(Pseudacris brachyphona)

Distribution: Forested wetlands >1000 m elevation

<http://www.apsu.edu/amAtlas/>

- Southern Appalachia
- Mostly Cumberland Mountains and Plateau

Family **Hylidae**

Southeastern Chorus Frog

(Pseudacris feriarum)

Breeding Call

- Running finger over comb but more metallic than *P. brachyphona*

SVL = 1"

Breeding Season

- Early (January)

Characteristics:

- Light to dark brown with dark triangle between eyes
- Three dark dorsal lines (usually)

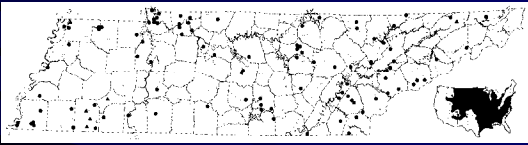

Earliest breeding frog

Family **Hylidae**

Southeastern Chorus Frog

(Pseudacris feriarum)

Distribution: Prefer emergent wetlands

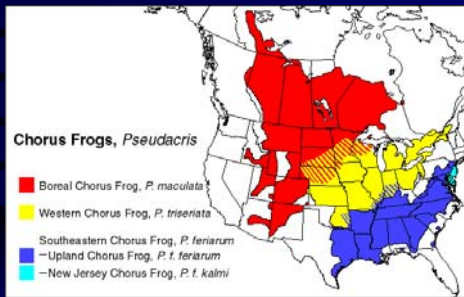

<http://www.apsu.edu/amAtlas/>

- Southeastern United States
- Statewide

Chorus Frog Distributions

Family
Ranidae

Crawfish Frog (*Rana areolata*)

Lives in
crawfish and
small mammal
burrows.

Breeding Call

- Deep "Waaaaa"
- Sounds like someone snoring

SVL = 2.5"

Breeding Season

- Early (March)

Species of
Concern
(G4, S4)

Characteristics:

- Dark spots encircled in white, white throat
- **Dorsal lateral folds very apparent**

Family
Ranidae

Crawfish Frog (*Rana areolata*)

Known to eat
crawfish and
small
amphibians.

Distribution:

<http://www.apsu.edu/amatlas/>

- Mississippi Alluvial Valley
- **West Tennessee**

Family
Ranidae

Gopher Frog

(*Rana capito*)

Breeding Call

- Deep drawn-out snore or growl
- Sounds like a woodpecker pecking

SVL = 3"

- Sometimes calls from beneath water

Breeding Season

- Early (Feb)

Species of Concern
(G3, S1)

Characteristics:

- Dark spots NOT encircled in white, spotted throat
- **Dorsal lateral folds & sacral humps apparent**

Family
Ranidae

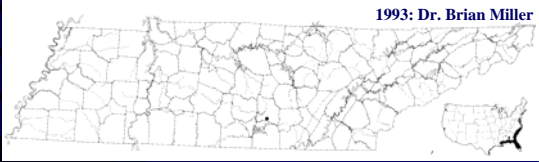

Gopher Frog

(*Rana capito*)

Life History in Tennessee is Unknown

Distribution:

Rarest anuran in Tennessee
1993: Dr. Brian Miller

<http://www.apsu.edu/amatlas/>

- Gulf Coastal Plain
- **Coffee County (Tullahoma)**

Family
Ranidae

American bullfrog

(*Rana catesbeiana*)

Breeding Call

- loud deep "jug-o-rum"
- Often play dead when handled

SVL = 5"

Largest frog in Tennessee

Eat anything can fit in mouth

Breeding Season

- Late (June, July)

Characteristics:

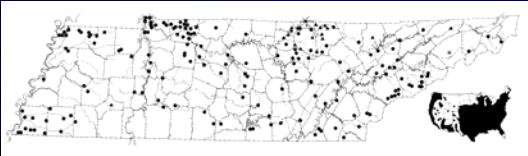

- Green or brown with dorsal lateral folds around tympanum
- **Males: Tympanum larger than eye**

Family
Ranidae

American bullfrog

(*Rana catesbeiana*)

Distribution:

<http://www.apsu.edu/amatlas/>

- Eastern U.S.
(introduced western states)
- **Statewide**

Family
Ranidae

Green frog

(*Rana clamitans*)

Breeding Call

- Short, explosive "glunk"
- Banjo string being plucked

SVL = 3"

Breeding Season

- Late (June, July)

Characteristics:

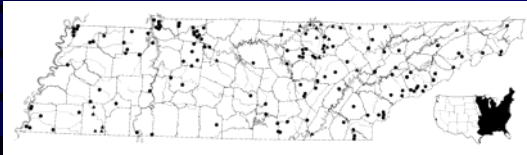

- Green or brown with dorsal lateral folds extending past tympanum, center of tympanum raised
- **Males: Tympanum larger than eye**

Family
Ranidae

Green frog

(*Rana clamitans*)

Distribution:

<http://www.apsu.edu/amatlas/>

- Eastern United States
- **Statewide**

Family
Ranidae

Pickerel frog

(*Rana palustris*)

Breeding Call

- Drawn-out, descending snore, "yeeeeeeooooow"
- Not as deep as *R. areolata* and *capito*

SVL = 2.5"

Breeding Season

- Early (April)

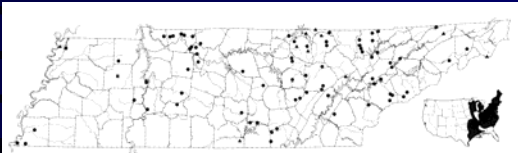

Characteristics:

- Tan with dark paired dorsal spots (square)
 - **No white spot on tympanum**

Family
Ranidae

Pickerel frog

(*Rana palustris*)

Prefer cool water with high water quality

Distribution:

- Eastern United States (excluding Gulf Coast)
 - **Statewide** (less common in west TN)

<http://www.apsu.edu/amatlas/>

Family
Ranidae

Southern leopard frog

(*Rana sphenoccephla*)

Breeding Call

- Series of clucks or chuckles
- Also, groans similar to rubbing hand over a balloon

SVL = 2.5"

Breeding Season

- Early (Feb, March)

Characteristics:

- Tan with dark dorsal spots in irregular pattern
 - **White spot on tympanum**

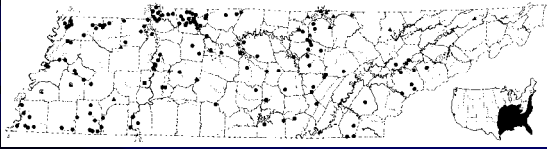

Family
Ranidae

Southern leopard frog

(*Rana sphenoccephla*)

Distribution:

Escapes predators by swimming underwater

<http://www.apsu.edu/amatlas/>

- Southeastern U.S.
 - **Statewide**

(not common in Smokies)

Family
Ranidae

Wood frog

(*Rana sylvatica*)

Breeding Call

- Series of clucks or chuckles (mallard)
- Interspersed with low grunts

SVL = 2"

Bi-colored Embryos
Black (above), white (below)

Forested wetlands often before ice is gone

Breeding Season

- Early (February)

Characteristics:

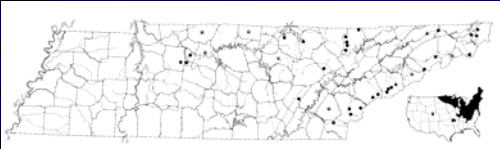

- Tan dark mask below and behind eye
 - **White upper lip**

Family
Ranidae

Wood frog

(*Rana sylvatica*)

Distribution:

<http://www.apsu.edu/amatlas/>

- Northeastern U.S.
 - **Middle & East TN**

Seasonal Occurrence

Tennessee Anurans

January: southeastern chorus frog

February: wood frog, spring peeper, gopher frog

March: American toad, southern leopard frog, crawfish frog

April: pickerel frog, mountain chorus frog

May: Fowler's toad, northern cricket frog, gray treefrogs, bird-voiced treefrog

June/July: green frog, American bullfrog, southern cricket frog, eastern narrow-mouthed toad, eastern spadefoot, barking treefrog, green treefrog

August-Dec: possible to hear most species especially after rains and on warm days in fall and winter, although breeding for temperate anurans is concentrated January-July.
